

Programming In Java

Title : Develop a Java Application demonstrating the use of default , parametrized and copy Constructor for object initialization and data management .

Source Code :

```
1. class Student{
2.     int id;
3.     String name;
4.
5.
6. //Default Constructor
7. Student(){
8.
9.     id = 0 ;
10.    name = "Not Assigned" ;
11. }
12.
13. //Parametrized Constructor
14. Student(int i , String n)
15. {
16.     this.id = i;
17.     this.name = n ;
18. }
19.
20. //Copy Constructor
21. Student(Student s)
22. {
23.     id = s.id;
24.     name = s.name;
25. }
26. //Display Method
27. void display () {
28.     System.out.println("ID :" + id);
29.     System.out.println("Name :" + name);
30.     System.out.println();
31.
32. }
33.
34. public class ConstructorDemo{
35.
36.     public static void main(String[] args){
37.
38.         //Default Constructor
39.         Student s1 = new Student();
40.
41.         //Parametrized Constructor
42.         Student s2 = new Student(101 , "Akshu");
43.
44.         //Copy Constructor
45.         Student s3 = new Student(s2);
46.     }
```

```
47.         System.out.println("Default Constructor :");
48.         s1.display();
49.
50.         System.out.println("Parameterized Constructor : ");
51.         s2.display();
52.
53.         System.out.println("Cpoy Constructor :");
54.         s3.display();
55.     }
56.
57. }
58.
```

Program Output :

```
● PS J:\COLLEGE_STUDY\Programming in JAVA\EXP_01+02> & 'C:\Program Files\Java\jdk
-17.0.19\bin\java.exe' '-XX:+ShowCodeDetailsInExceptionMessages' '-cp' 'C:\Users
\ASUS\AppData\Roaming\Code\User\workspaceStorage\90e5624b2290e1172e88cb0665534b1
a\redhat.java\jdt_ws\EXP_01+02_d6b3e304\bin' 'Student$ConstructorDemo'
Default Constructor :
ID :0
Name :Not Assigned

Parameterized Constructor :
ID :101
Name :Akshu

Cpoy Constructor :
ID :101
Name :Akshu
```
